u planiranju od 15% ispod
- Da li je PwB planirano da KPIs se planiraju
odgovaraju tvrtki koja je u 10% ispod

Projects

Ecommerce Analytics: Did a table function to display the data to be used by the SQL, and the (E-commerce) SQL, the Query.

API Integration Project: Design and implement a RESTful API to integrate with GitHub Webhooks. The API will handle incoming webhook events, validate them, and trigger internal workflows. It will be built using Node.js and Express, with a focus on security and scalability. The API will be deployed to a cloud environment and monitored for performance and errors.

Supply Chain Intelligence: On the edge of ML, AI, and data analytics, SC intelligence is the new frontier in supply chain management. It involves using advanced technologies to gather, analyze, and act on data from various sources to optimize supply chain performance.
